

This is a short guide aimed at showing how to configure Google-drive for business to enable the SimSage Google-drive crawler.

You need to be an administrator for your Google business account. Sign-in to <https://console.cloud.google.com/>

Click on the drop-down box to the right-hand side of the “Google Cloud Platform” text. This will show you your project-id which you will need for our crawler.

Select from **PETER.CO.NZ**  **NEW PROJECT** 

 Search projects and folders

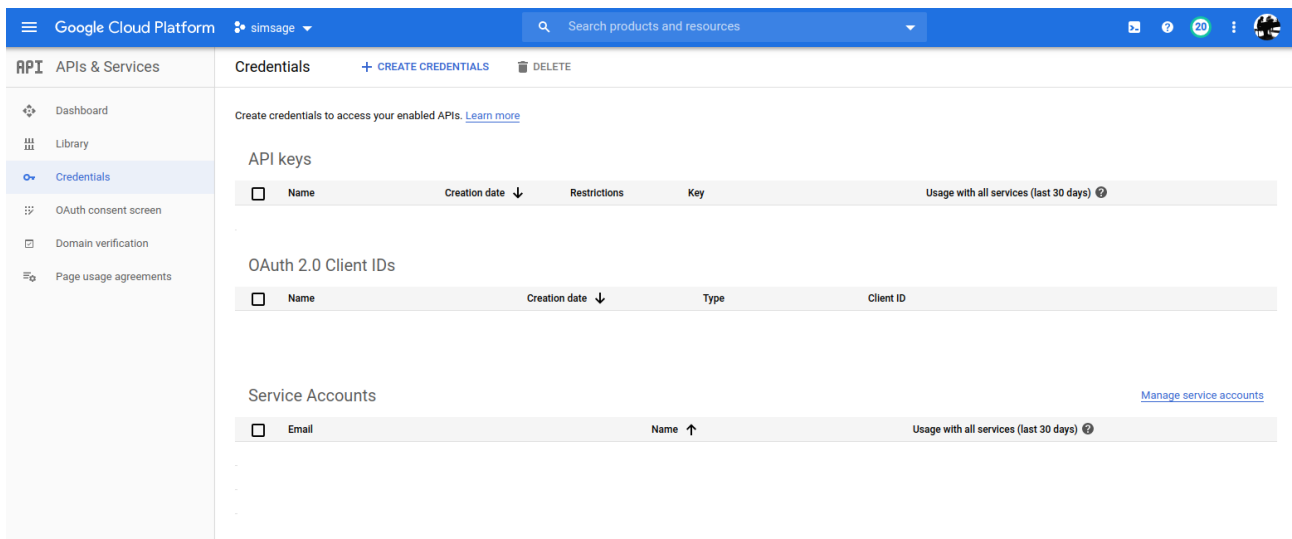

RECENT **ALL**

Name	ID
  simsage 	S XXXXXX 0

CANCEL **OPEN**

Copy the text from the ID column for your own project.

Now we'll create a “client-id” and a “client-secret” for accessing Google-drive. Search for “APIs & Services” and click on the “Credentials” menu on the left hand side.

Click on “+ CREATE CREDENTIALS” at the top to create a new OAuth 2.0 Client ID.

Create OAuth client ID

A client ID is used to identify a single app to Google's OAuth servers. If your app runs on multiple platforms, each will need its own client ID. See [Setting up OAuth 2.0](#) for more information.

Application type *
Web application

[Learn more](#) about OAuth client types

Name *
SimSage Web Application

The name of your OAuth 2.0 client. This name is only used to identify the client in the console and will not be shown to end users.

The domains of the URIs you add below will be automatically added to your [OAuth consent screen](#) as [authorised domains](#).

Authorised JavaScript origins ⓘ
For use with requests from a browser

URIs
https://simsage.ai

[+ ADD URI](#)

Authorised redirect URIs ⓘ
For use with requests from a web server

[+ ADD URI](#)

[CREATE](#) [CANCEL](#)

This will bring up the following screen. Select “Web application” for the Application type. We suggest you use “SimSage Web Application” for the name, but this can be anything you like. Add your SimSage platform URL to the Authorized JavaScript origins. This is most likely something like <https://simsage.ai> or <https://simsage.co.uk>

Click the “CREATE” button at the bottom to continue. This will bring up the following dialog box:

OAuth client created

The client ID and secret can always be accessed from Credentials in APIs & Services

OAuth is limited to 100 [sensitive scope logins](#) until the [OAuth consent screen](#) is verified. This may require a verification process that can take several days.

Your Client ID

-dqodrqrjusa29s4aj32dhuj44rvcsigl.apps.gc

Your Client Secret

9KyrA14VYgS20YnSTDCJ_fmd

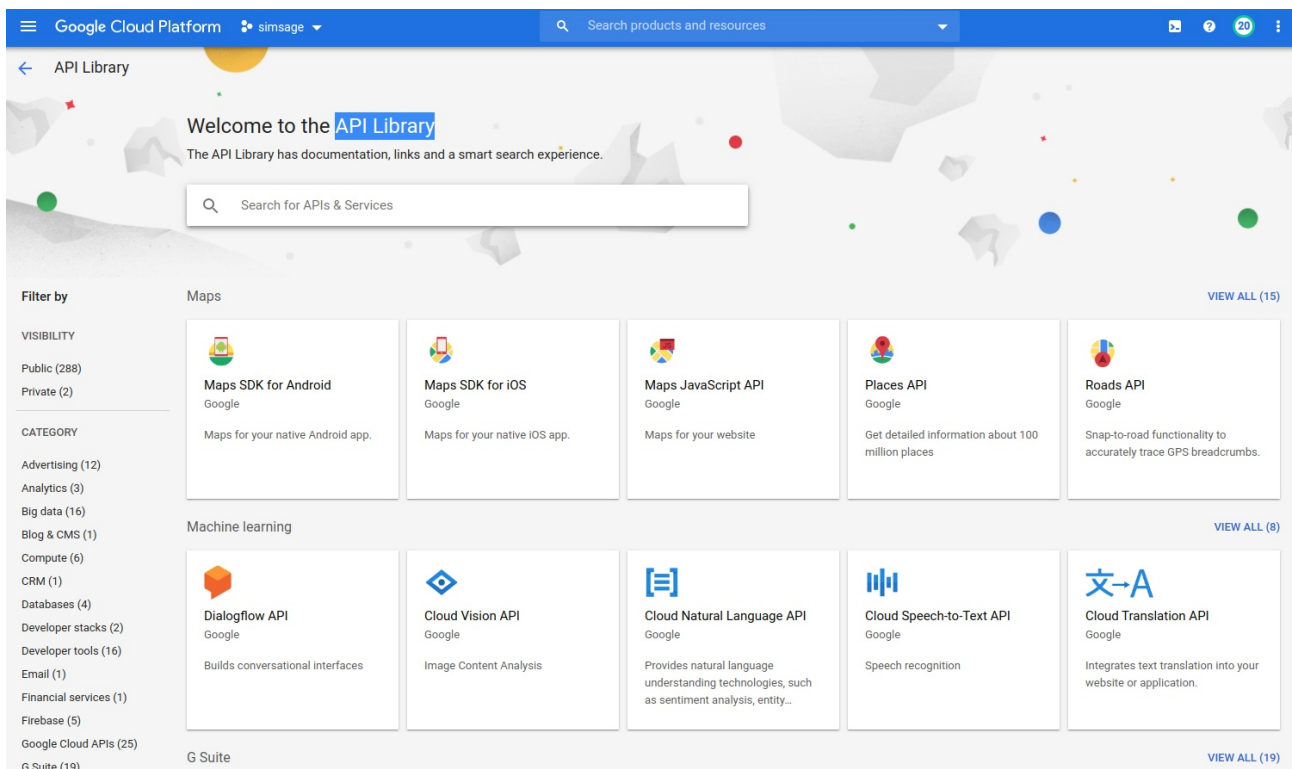

OK

Copy the Client ID and Client Secret from this dialog box before closing it by clicking OK.

We now have all three parameters required by the SimSage Google-drive crawler. Visit the following link to enable Google-drive access:

Search for “API Library” and navigate to the following screen.

Type “Google Drive API” in the “Search for APIs & Services” text box. Click on “Google Drive API” and click the “ENABLE” button to enable access.

You will see an API enabled after clicking this button. The SimSage Google-drive crawler now has access to your Google-drive files.
